**NOTIFICATION IN ACCORDANCE WITH ARTICLE 3 OF THE CONVENTION ON ENVIRONMENTAL IMPACT REGARDING DECOMMISSIONING OF THE IGNALINA NUCLEAR POWER PLANT**

As a country of origin under whose jurisdiction a proposed activity is envisaged to take place, the Republic of Lithuania hereby notifies potentially affected countries about a proposed activity listed in Appendix I to the UN Convention on Environmental Impact Assessment in a Transboundary Context (hereinafter referred to as Espoo Convention) – Nuclear power stations and other nuclear reactors, including the dismantling or decommissioning of such power stations or reactors (Appendix I clause 2(b)).

Developer of the project is the State Enterprise Ignalina Nuclear Power Plant. The project – **Decommissioning of the Ignalina NPP** – has been started with the preparatory planning in 2001 and is planned to be completed by the end of 2038 with demolition of relevant engineering structures on the Ignalina NPP site and remediation of the site. The project covers dismantling and decommissioning of equipment including dismantling of reactors.

Two countries – the Republic of Belarus and the Republic of Latvia – are relatively close to the location of the proposed economic activity. The state border of Lithuania and Belarus is located about 5 km to the east of the INPP power units, and the state border of Lithuania and Latvia is located about 8 km to the north of the INPP power units. It is not expected that the project will make a significant effect even within the territory of Lithuania, however making the most careful consideration based on the precautionary principle and taking into account the preliminary survey of the opinions of countries, transboundary EIA will be carried out and not only neighbouring countries but also the countries of the Baltic Sea region are notified or informed about the project.

The decision regarding the environmental impact of the proposed economic activity will be made by the competent authority – Environmental Protection Agency, taking into account potential environmental impacts, proposals of the public concerned, the results of consultations with national entities of environmental impact assessment (other state institutions and executive institutions of relevant municipalities), and the results of transboundary consultations.

Further information on the project and its possible transboundary impacts is provided in the Summary of the environmental impact assessment programme (scoping document), attached to this notification (in English).

Taking into account that Lithuania and Poland have concluded a bilateral agreement, in which it is agreed on the submission of documents in Polish when the party of origin is Lithuania, we also provide a translation of the notification and the summary document into Polish.

Referring to Article 3.3 of the Espoo Convention and other relevant provisions of international and national legislation we kindly ask you to respond by **September 3, 2023** at the latest by:

- acknowledging the receipt of the notification;
- providing comments concerning the environmental impact assessment;

- submitting any comments you might receive from the public and relevant authorities in your country;
- indicating whether you intend to participate in the environmental impact assessment procedures as a potentially affected country.

Please address your response to this notification to Mr. Vitalijus Auglys, Point of Contact regarding Notification in accordance with Article 3 of the Convention on Environmental Impact Assessment in a Transboundary Context:

Mr. Vitalijus Auglys  
Head of Pollution Prevention Policy Group
