Yttrande över remiss från Naturvårdsverket gällande bemötande från Polen på svenska yttranden gällande det havsbaserade vindkraftsparken Baltyk I samt förfrågan från Polen om Esbosamråd enligt artikel 5 kan anses avslutat

The Swedish University of Agricultural Sciences (SLU) has taken part of the responses to the comments that SLU had made in February 2024, concerning the Environmental Impact Assessment Procedure submitted from Poland for the wind park Baltyk I in a Transboundary Context (Espoo Report).

SLU finds that all comments and aspects that were raised by SLU in February 2024 were adequately considered and responded to, and that the information and assessment are sufficient to allow the Swedish Party to consider the transboundary consultation.

Dean Torleif Härd has, with the authority by the vice chancellor, made a decision regarding this remark after submission from coordinator Linda Ferngren. The content has been composed by researchers Lena Bergström, Birgit Koehler and Mattias Sköld at the department of Aquatic Resources.
